

Rim opgave, med rim fra rim-domino.

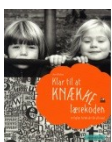

Godt vi har haft ordene i en opgave først, for så kan vi bedre se hvad der rimer. (OK, det var vist en voksen kommentar)

Inden børnene løser denne opgave, skal underviseren sige hvert ord, og børnene skal pege på det og gentage ordet.

Det hjælper børnene til at vide, hvad der er på billedet. Tror børnene at det er 'våben' og 'frugt', så rimer det ikke, men ved de at det er 'citron'-'kanon', så har de en reel mulighed for at rime.

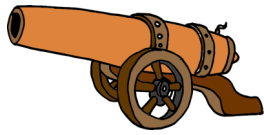

Hvert billede i den venstre række rimer med et i den højre række. Børnene skal tegne streger mellem de billeder der rimer.

Det er min oplevelse at det er godt at børnene arbejder sammen to og to. Når et makkerpar har løst opgaven, skal de ud med et andet makkerpar og læse deres løsninger op for det andet makkerpar. Først læser det ene barn alle rimordene op, så læser det andet barn alle rimordene op, imens det andet makkerpar kontrollerer at de læser rigtigt op. Derefter er det det andet makkerpars tur til at læse op.
