Kapitel 13 'Forløbet om trylleord og tryllebogstaver'

Trylleords opgaver (med tekst)

Kære Underviser

Et trylleord er et ord, der kan 'trylles' om til et nyt ord, ved at sætte et bogstav (en bogstavslyd) foran.

Når børnene laver trylleord, øver de at sætte et bogstav sammen med et ord, så de nemmere kan det, når de skal sætte bogstaver sammen til ord (de lærer at trække bogstavslydene sammen). Når de sætter en bogstavslyd foran et trylleord, øver de sig også i at lytte efter, hvilket nyt ord der opstår (hvad det er de læser). Læs mere om det i kapitel 13 i 'Klar til at knække læsekoden, 10 faglige forløb der får alle med'.

I opgaverne er der i første felt en bogstavslyd, i tredje felt et trylleord og i sidste felt skal børnene tegne, hvilket ord der opstår. Det er meget vigtigt, at børnene ved, hvad trylleordet er, da f.eks. v-muskel ikke giver mening (men det gør v-arm).

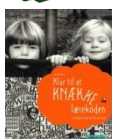

Når det arbejdes med trylleord, arbejdes der med den lydrette gengivelse og ikke altid med korrekt stavning.. F.eks. bliver 'p' foran 'ost' ikke til 'post' (men mere til et latinsk ord), imens 's' foran 'mug', bliver til smuk.

For at finde trylleord nok, er jeg blevet nødt til at gå lidt på kompromis, da en del konsonanter ændrer lyd, når der f.eks. sættes 's' foran. Sætter man f.eks. 's' foran 'ti' så lyder 't' i 'sti' som et 'd'. Det er ikke min oplevelse at det volder børnene de store problemer, når først de har prøvet det med nogle helt lydrette ord.

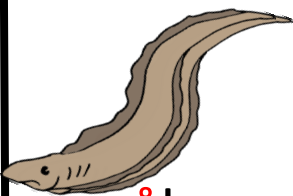

Læs mere om det i kapitel 13 i bogen: 'Klar til at knække læsekoden, 10 faglige forløb der får alle med'.

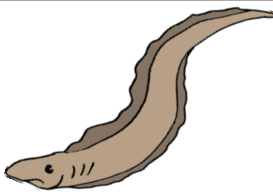

*God fornøjelse med at øve børnene i at trække
en bogstavslyd sammen med et kendt ord
og høre hvad det bliver.*

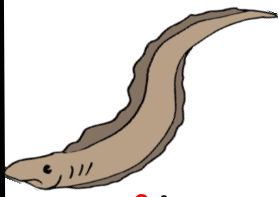

*Mange venlige hilsner
Jens*
