

Skrivebog

c, q, w, x og z suppleringsbog

Skriv dit navn her.

I det store skrivehus skal barnet skrive bogstavet 5 gange. Barnet skal følge skriveretningen som angivet og blyanten skal løftes mellem hver gang. Det er vigtigt at underviseren instruerer barnet i, at skrivestregen i bogstavet rører loft og gulv.

I de mellemstore skrivehuse, skal barnet skrive 4 bogstaver i hver skrivehus. Barnet skal følge skriveretningen. Mind børnene om, at skrivestregen skal røre stregerne de rigtige steder. Ved 'a' skal skrivestregen røre loftet og gulvet i stuen 2 gange. Der er grønne prikker, hvor børnene skal starte bogstavet.

I dette almindelige skrivehus skal barnet skrive ovenpå de bogstaver, der er lavet og lave et bogstav ved hver grøn prik. Barnet skal følge skriveretningen. Det skal sørge for at bogstavet rører de steder hvor underviseren har instrueret i det. Ved 'a' skal det røre loftet og gulvet i stuen 2 gange.

Her skal børnene farve de 2-3 bogstaver. Hvis det er vokaler, skal de farves røde, hvis det er konsonanter skal de farves blå.

Her skal barnet farve alle felterne med dagens bogstav. Røde ved vokaler og blå ved konsonanter. Resten af bogstaverne farves gule. Det er godt at have ekstra blå, røde og gule farveblyanter klar.

I dette almindelige skrivehus skal barnet skrive ovenpå de bogstaver, der er lavet. Her er der ingen grønne starts-prikker, her skal barnet helt selv lave de bogstaver der mangler.

Her skal barnet skrive i ordets bogstaver i den angivne skriveretning. Er det et kort ord, skal barnet skrive det flere gange og bruge de grønne starts-prikker.

Dette skrivebogssystem kan med fordel suppleres med at børnene får en forældreinvolveringsseddel med hjem dagen før, og børnene laver en repetitionseddel senere på dagen.

Når børnene skriver bogstaverne over 3 gange i stedet for en, får de meget bedre dannet de rigtige nervebaner (synapser), der skal til for at styre de finmotoriske skrivebevægelser.
